

OneNG Blockchain

OneNG Blockchain

OneNG - truly commercialized

Blockchain

- **Superfast transaction speed.**
Every 15 seconds a block is found. No more waiting.
- **Just Micro-Fees.**
„Must have“ for transactions with smaller amounts.
- **Extremely sustainable, low ennergie consuming** „Proof of Authorization“ method, based on Validation Tokens (OneV).
- **Extremely simple handling of the nodes:** free cloud service. Shared nodes are also available. On premise operation of a node is also possible.
- **Reward per block** is 22 ONGC Coins for the first 6 month. Following that, the reward will be 11 ONGC, which will be distributed among the network's participants. The network's participants will receive rewards from transaction fees once all ONGC have been distributed.
- **ONGC coin rewards are transferable anytime** from the DApp (it's a website) to MetaMask. Secure - **code is law**. OneV tokens remain unaffected when ONGC-coin rewards are transferred to the MetaMask wallet.
- **Projects, projects, projects** - are already in development: Social Shopping, NFT Marketplace with NFT-hedging, Sports Betting App and a participation opportunity for statististical trading packages in the betting area. All planned for 2022.
- **App for coin-transactions** especially for millions of Shopify-shop owners is in the pipeline for early 2023.
- **Extensive Scouting** for new projects and partners.

Introduction

Blockchain Technology

The era of digital transformation brought us Web 2.0, a web of data. Blockchain will bring us to Web 3.0, a Web of data, security and trust.

Trust, anti-counterfeiting and uniqueness have always been a problem in the global marketplace and especially when doing business over the internet. This is where blockchain creates numerous solutions and opportunities.

Blockchain is a brilliantly straightforward, advanced application that allows data (such as transactions or proof of ownership) to be both anonymous and secure by keeping a tamper-proof, open record of all data collected.

Banks, insurance companies and large corporations are constantly working on blockchain-oriented solutions. In the long term, this will change business models and how transactions are being processed. These, however, are industry solutions.

A solution that is commercial and geared to the needs of consumers has not yet been created. Numerous niche solutions mainly consist of tokens and only provide minor solutions to specific problems, but a blockchain solution that covers daily needs and encompasses all areas of life has not yet been created.

This is exactly where the OneNG project comes into play.

One Next Generation Blockchain

Commercial Focus

OneNG Blockchain is an advanced, capitalistic blockchain focusing on partner companies and their products as well as easy access for customers.

OneNext Generation is a blockchain based on Ethereum. This reduces barriers to entry and ensures a rapid adoption, because any ETHEREUM wallet can be used by simply adding our network to the wallet software.

Also, all existing smart contracts can be used and easily executed on our blockchain.

With OneNext Generation Blockchain, companies, customers and all crypto interested users get the opportunity to easily enter the market and be accompanied in the best way possible.

We create a One NG universe with our own projects and our partner companies, which results in numerous usage possibilities for One NG Blockchain Coin, ONGC.

In order to create affiliate projects and application possibilities for the One NG Blockchain and the One NG Universe, we rely on our own scouting team, which analyzes and evaluates user feedback and customer wishes, and recognizes trends and long-term projects to be integrated into our universe.

The OneNG Blockchain

Overview

OneNext Generation Blockchain is not just a copy of an existing network, but an Ethereum fork which has been adapted to a Proof of Authorization system. By offering a verification token, it is easy for them to become a significant part of the network. This means that you directly contribute to keeping the data private and secure while receiving OneNG Coins as a reward.

Through the Proof of Authorization process you can easily become part of our network. You can run your own node or participate in our shared node system.

After purchasing validation tokens, you can easily bind them to the node smart contract and immediately become part of the network and receive rewards.

Pros

- Low energy consumption / Green Blockchain.
- Ethereum-based Software and Contracts are running on the One NG Blockchain.
- Direct partnerships with stores and service providers create a ONE NG universe, which offers numerous application areas for the ONE NG Coin and provides everyone with an easy entry to Digital Native Living

Node

Advantages

Nodes are the account points of the blockchain network. They are critical for a secure operation. A Node connects to the global One NG Blockchain network and keeps a duplicate of all transactions. At the same time, a Node secures and enables communication within the network.

The main purpose of a node is to confirm transactions and contracts that have been made, so they can be stored in so-called blocks in a blockchain. Each node is an important part of the decentralized network and makes the One NG blockchain secure and reliable.

Our nodes rely on the Proof of Authorization process. Here, the node must prove that it is authorized to participate in the network. Only after this proofing method, the node can actively participate in the network.

This has decisive advantages over the Proof of Work and Proof of Stake procedures.

In the Proof of Work procedure, your node must prove that it has performed for the network. This can be done by using complicated calculations. The more participants a network has, the more complex these calculations become. Not only does this result in enormous power consumption and ultimately harms the environment, it also makes it difficult to get started the easy way.

Although this problem has been solved with Proof of Stake, but even this procedure entails problems we could solve with the Proof of Authorization procedure. With Proof of Stake, you can deposit the blockchain coin on your node. The more coins you have deposited in your node, the sooner your node can contribute to a block to receive a reward. This increases your coin holdings, but they cannot be used freely in the blockchain universe. This is because doing so would reduce their participation in the network.

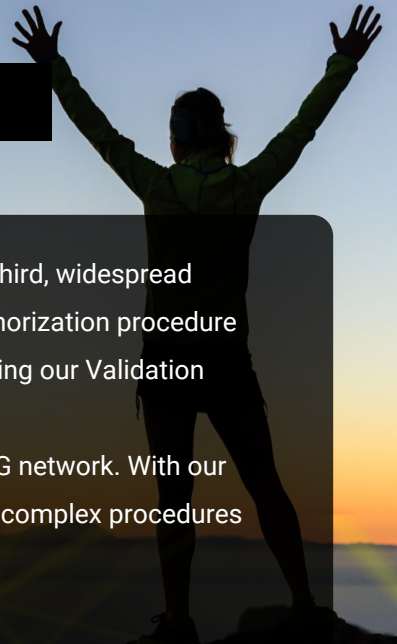

Our Proof of Authorization process uses the advantages of the Proof of Stake process and complements them with the classic advantages of Proof of Authorization. Through a specially created validation token, the One V, you can prove the authorization of your node at any time or prove your authorization for our shared node and become part of our network network.

As a reward, you will receive OneNG Coins, which are immediately available for free use without any disadvantages.

Validation Token (OneV)

Node & Shared Node operation

In addition to Proof of Work and Proof of Stake, Proof of Authorization is a third, widespread utilized procedure for the blockchain. The OneNG Blockchain's Proof of Authorization procedure has quite a number of additional advantages. You can simply join a node using our Validation Token, OneV.

With OneV validation tokens, you can prove your authorization for the OneNG network. With our validation tokens, you can easily become an operator of a node without any complex procedures in order to make an essential contribution.

- A node contributes to transaction security by maintaining the blockchain.
- With our validation tokens, you can efficiently and rapidly become a node operator and contribute significantly.
- ONE NG validation token can be purchased at the price of 10 Euros.
- The maximum number of Validation Tokens is 100.000.000.
- Validation tokens and OneNG Coins (ONGC) Coins have a 1:10 ratio. The Nodecontract distributes a sum of 1,000,000 ONGC.

Node & Shared Node Operation

- In order to run your own node, you need a minimum of 10,000 OneV validation tokens. You'll need a minimum of 10,000 validation tokens to run your own node.
- Our node application can be easily downloaded and installed from our Github account.
- Our shared node is available if you need less
- than 10,000 validation tokens to get started. simply connect your wallet and validation tokens to our Shared Node Contract, you will be immediately recognized as valuable member of our network. All processing are done thru a Dapp, giving you a total control at all times.
- This method of operation provides people with the strongest level of security. They can also download the DApp and run it on their own server at any time. They can access their assets at any time because "code is law."

Fundamentals

OneNG Coin - ONGC

- Operators of a node and participants of the Shared Node are rewarded with One Next Generation Coins, ONGC for each block found.
- This reward is 22 ONGC per block found in the first 6 months, starting May, 1st 2022, which is distributed among the deposited validation tokens.
- Following that, the reward per block will be 11 ONGC, which will be distributed among the network's participants. The network's participants will receive rewards from transaction fees once all ONGC have been distributed.
- Participants within Shared Node can access their rewards via DApp at any time.
- They are sent to node operators' wallets immediately.

OneNG's Blockchain Objective

- The One NG Blockchain was created to encourage the use of crypto technology in the commercial sector.
- One NG = Increasing the value of a product through commercial development
- ONGC is the fuel of the OneNG universe.
- Secure your access to the services of the universe today.

Applications für OneNG

Project Pipeline

Social Shopping App

Users have access to a gigantic product catalog (average prices of assets 50 Euro) through a social shopping application. They will not only shop with friends, promote in their network and get discounts they can use their ONGC für transactions.

NFTPlus

The NFT market is consistently growing. With NFT Plus, you can participate without taking a major risk. It's not always easy to predict how an NFT might rise in value. This is where NFT Plus comes into effect. You get the security of being able to sell the NFT back to us after an agreed-upon holding period if you hedge in BTC or ONGC.

Sports Betting

State of the Art sports betting platform with full crypto integration.

STP Structural Trading Package

With STP, individuals become part of the global betting market. Experts supported by AI, with constant profits in the sports betting market. With ONGC they get privileged access to this product.

Company Mission

Our goal is to create a comprehensive product universe which allows One NG Blockchain users to create as many use cases as possible - we accompany them on their way to becoming digital natives.

NFTPlus – Upgradable NFT

Overview

The Offer

- NFTs are digital artworks whose ownership can be proven using blockchain technology. The NFT market is booming, and it's possible to make a lot of money. Nonetheless, the buyer is always exposed to the risk.
- His NFT would be a loss if he does not find a buyer for his artwork. This risk can be minimized with NFTPlus.

NFTPlus

All of the benefits of a traditional NFT are available with NFTPlus. You own the digital artwork and can sell it for a higher price at any time. At the same time, your NFT is linked to Bitcoin or ONGC, and you have the option of selling your NFT back to us after the agreed-upon term has passed. As a result, the increase in the value of the deposited asset benefits you directly.

How can I benefit?

- NFT = A digital work of art that can increase in value.
- In the event of that, you will benefit from the increase in value.
- NFTPlus = A digital work of art which can rise in value over time and be resold at any time. Your NFT, on the other hand, is linked to a deposited Bitcoin or ONGC asset. You can sell your NFT back to us at any time and receive the deposited asset in the end of the agreed term. As an outcome, you directly benefit from the solid growth of these crypto assets.

Advantages of NFTPlus

Like a classic NFT, collectors of NFTs benefit from the increase in value of their artworks. At the same time, they also profit from the development of crypto markets. Users have access to a large product catalog (average prices of assets 50 Euro) through a social shopping application. They will not only shop with friends, promote in their network and get discounts they can use their ONGC for transactions.

What makes NFTPlus stand out?

When you upgrade your NFT to an NFT Plus, you'll be tied to a new crypto asset. You have the option of attaching your NFT to Bitcoin or the ONGC. As a result, users will be able to trade their NFT for these assets and profit from the increase in value.

The way to NFTPlus

- Choose a term ranging from one to five years. The price of your upgrade differs between 5 and 15% depending on the term and asset selected.
- Choose whether to connect your NFT to Bitcoin or ONGC. You will receive another certificate after your purchase verifying the binding and deposit of your assets. In that way Your NFT has been upgraded to an NFTPlus.
- Individuals can sell their NFT to us at any time during the term and gain access to the deposited assets.
- If you haven't found a buyer, once the term has expired, you can sell your NFT to us at any time and get access to the deposited assets.

Upgrade to NFTPlus

- Choose an NFT from our extensive gallery that suits your preferences. Our gallery includes different works for everyone.
- Buy your NFT from your consultant, at a trade show or online. including a certificate containing all wallet details.
- Your NFT will be delivered directly into a newly created wallet and you will receive a certificate with all data about the wallet. This way, you can freely dispose of your NFT at any time.
- As an outcome, you can dispose of your NFT at any time.

Statistical Trading

STP Statistical Trading Package

A group of analysts, supported by AI and AI, generates constant profits in the sports betting market. Trading packages are available to all clients of these experts, which allows these clients to profit from the profits of betting.

Statistical Trading Package

The goal of this proposal is to provide the general public access to professional sports betting.

Entry barriers and the offer

- Entry into this product is usually not possible below USD 100,000. Without any contacts, a purchase is often not possible.
- The OneNG cooperation gives interested customers the opportunity to purchase the product without any issues. At the same time, One NG takes care of a reliable and secure processing.

Approach

Access to the Trading Package is uncomplicated via One NG:

Step 1: Buy a Trading Voucher:

- To gain access to the product, a one-time purchase of a trading voucher is required.
- The income from the sale of vouchers is used exclusively to finance the trading team and the necessary IT.

Step 2: Buy a Statistical Trading Package

- The Trading Voucher now gives access to the Statistical Trading Package. Acquisition of the desired quantity of ONGC, which are subsequently deposited and used for the Trading Package.
- Receipt of the package's profit share (approx. 18% per year) and repayment of ONGC upon expiration of the trading package.

Statistical Trading

the chances

- Trading Package holders benefit from a steady increase in value of their package.
- The increase in value over the last 10 years has always been in double digits. The sports betting market is growing constantly and reliably.
- At the same time, holders of the trading package benefit from the general increase in the value of ONGC. Although the number of ONGC in the Trading Package increases constantly, the value of each individual ONGC can increase significantly at the same time. After expiration of the Trading Package, you as the holder will not only profit from the attractive profit sharing, but also from the increase in value of each individual ONGC in your possession.
- After receiving ONGC, they can spend it at any time within our product universe or exchange it for FIAT money on a regulated crypto exchange.

- With the Statistical Trading Package, you will benefit from the sports betting market and from the increase in the value of ONGC.
- The Statistical Trading Package does not only increase your ONGC. Holding these assets for a long time also gives you the benefit of an overall increase in value.

Crypto Bets

Overview

OneNG is developing a special crypto wallet to meet the needs of the sports betting industry. It enables secure transactions in all areas of betting. An acceptance of ONGC for betting is required.

Betting Process

- The customer buys crypto assets and transfers them to their Bettingwallet. The platform immediately credits the customer's Crypto Voucher.
- As soon as the customer wants to place their bet, it can be placed without any further delays.
- In the background, the cash management decides whether to sell the crypto at a stock exchange right away or to create a nostro position.

Risk minimization

In the field of crypto wallets, payments and transactions, there is always a risk of security breaches and hacker attacks. In the worst case, there is a risk of total loss of all stored assets. To prevent this, OneNG has established a variety of security mechanisms.

- We only work with large exchanges that have security measures in place.
- We only work with large exchanges that have security measures in place and provide proof of funds on a regular basis.
- Our API only gets access to virtual crypto vouchers, not to the actual hot wallets. If access to hot wallets is required, further security audits take place.
- We hire audit companies to validate our measures.
- We only work with approved and regulated banks.
- We work with cold wallets wherever possible. To gain access to the product, a one-time purchase of a trading voucher is required.
- The income from the sale of vouchers is used exclusively to finance the trading team and the necessary IT.

Social Shopping

Nikelle, The Social Shopping (R)Evolution

Social Shopping Process

Desired products

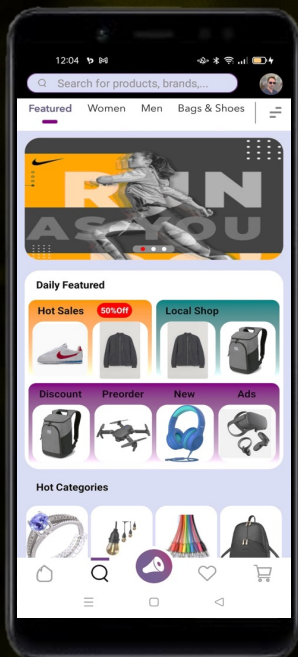

- The app knows its users' preferences and anticipates which product the user is interested in.
- This means that the user does not have to search through 500+ different products. They will receive an instant recommendation of the product that suits them best.

Price benefits

- By predicting demand, products are purchased and stocked in large quantities. We pass this price advantage on to our users.
- In addition, users receive further discounts through group purchases.

Social Shopping

- Discover what products your friends and contacts like and buy. You can also shop together with your friends and get discounts

The OneNG crypto wallet has been integrated into the Nikelle-Social-Shopping App.

All purchases accept 100% OneNG Coin (ONGC). Thus, the free reward coins get a direct benefit for everyday life. The product catalog is huge and similar to Aliexpress. Cheap products for everyday use. Without detours.

Shopify

The One NG crypto wallet will be made available to all Shopify stores, making ONGC available as a payment method in these stores.

Why should I join OneNG?

Most important reasons

- As a OneNG validation token holder, you become an active member of our network to ensure the security and reliability of our blockchain. This way, you will make an important contribution to decentralization.
- As a reward for your trust and support you will receive a share of the block
- reward, which is paid with each created block.
- The amount of this reward is measured by the number of validation tokens, you
- have deposited in the Node contract. With a ratio of 10 ONGC per 1 OneV
- (validation token), the calculated value is €1 per ONGC.
- ONGC are not sold directly. They are locked in the node contract and are only issued as a reward. The entire stock of ONGC will be
- be distributed over the next 25 years.
- During this period, the possibilities for using ONGC also increase.
- There are numerous possibilities for use right from start, but these will be significantly expanded. Thus, there will be a large demand for ONGC which will exceed the available ONGC.
- Since ONGC will be negotiated on leading crypto exchanges, they will benefit the expected increase in value, but they can also convert it into FIAT money at any time.

Become a Marketing Partner

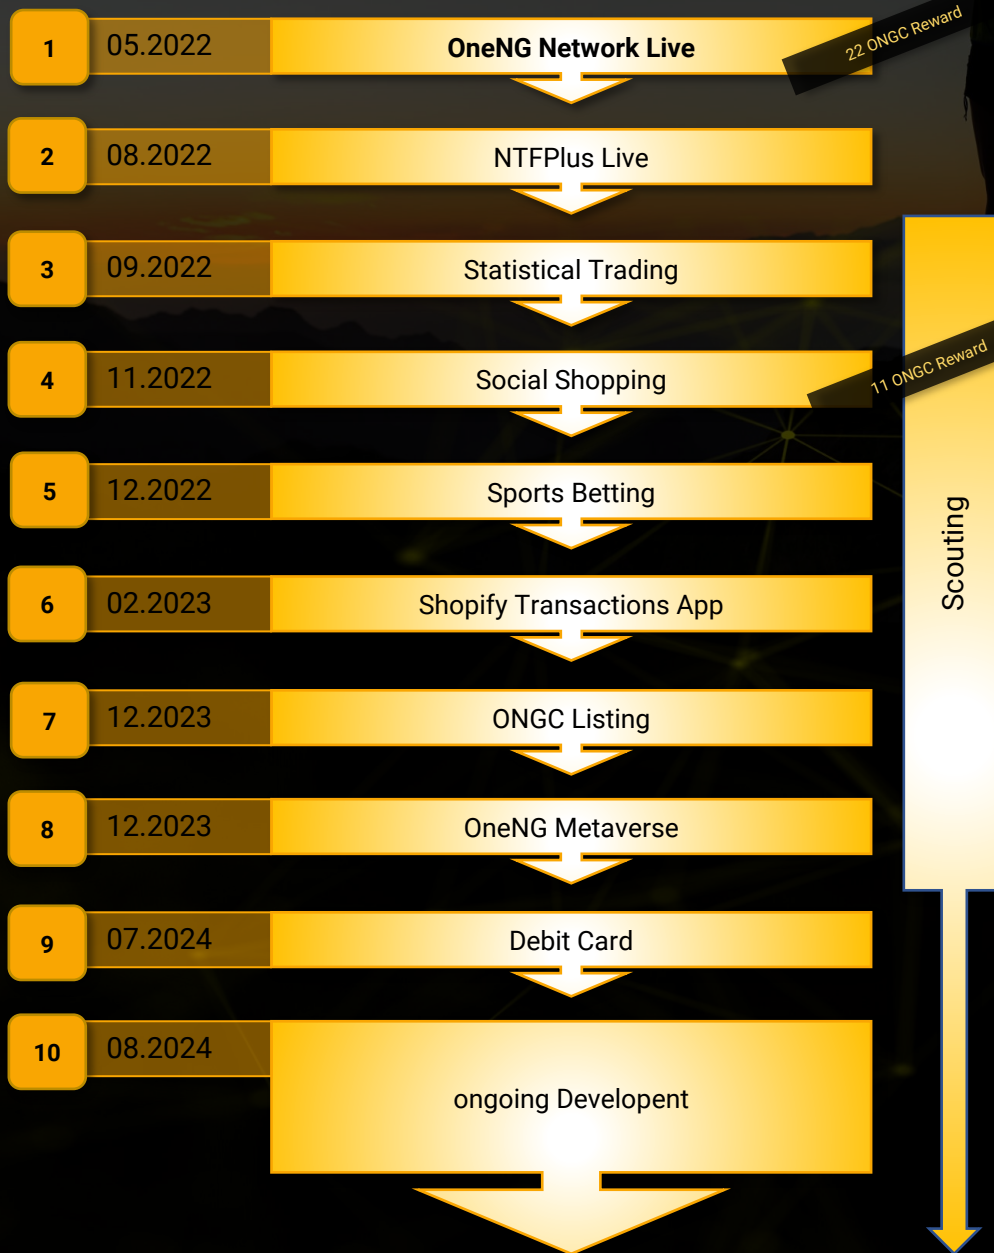

You believe in the future of commercial blockchain products and are active in marketing and sales? Then do not hesitate and get in touch with us today.

Disclaimer

PLEASE READ THIS DISCLAIMER BEFORE ENTERING IN A BLOCKCHAIN & CRYPTO ASSETS

Before entering in a blockchain and crypto assets, we urge you to read this disclaimer, understand it and its meaning, thank you.

This portion is designed in a simplified manner to aid ease of comprehension for anyone who reads it. Relevant information in relation to our platform will be elaborated upon thus providing insight on the choice to make as regards the OneNG project.

The information presented and provided in this document are not provided as a means of solicitation or a contractual relationship of any kind. It does not constitute a prospectus and does not provide a means for buying securities in any way possible. This platform does not provide protection to any individual and all supporting documents have been written 'as is' for providing information in all necessity. Under no circumstances do we make investment recommendations in this regard. There shall be no warranties provided by us regarding this project and its connected services. This is a project under development, some of the estimates and projections made may be future statements that currently have not been brought into realization. These projections might be speculative, uncertain and may bring about differences between documented facts and real-life events.

All information provided in this whitepaper and its connected services, supportive documents and website cannot be declared historical facts but due to the nature of the project, these declarations are based on assumptions and total accuracy of prediction may not be fully guaranteed.

Consultation between you and your trusted advisors and your legal guardian is highly advised before venturing into cryptocurrency of any kind. This will help provide insight to avoiding penalties from the government and give better explanation needed before buying digital currency. The token sales and general cryptocurrency transactions on our platform will only be made available to those who are legally qualified to purchase and hold cryptocurrency in their country.

Always ensure to understand the law of the land regarding digital currency before initiating a purchase. Ineligibility to hold cryptocurrency will most likely mean that it may be an offense to also buy cryptocurrency or crypto assets so we strongly advise you to make necessary findings and be aware of your status regarding this.

Suppose you purchase our cryptoassets without following the said rules applicable to you regarding cryptocurrency utilization in your area of residence, you risk legal actions being taken against you and this might incur heavy fines or more extreme penalties being passed against you. In such a situation, neither OneNG executives nor its team members will claim liability on your behalf as prior warning has been given in relation to understanding the guidelines concerning purchasing and holding digital currency.

Negative consequences that may come about will be the responsibility of the user and if purchases are made under illegal circumstances, confiscation of digital currency or more extreme legal consequences may come about. On this account we would like to let you know that whatever action and steps you take concerning the OneNG/OneV token will be at your risk and discernment.

All information provided here has been reviewed by our team members and we have deemed it fit to be accurate to the best of our knowledge, however, acting upon the information provided on this document and its supportive services means that you

are aware of the various risks that may befall cryptocurrencies and you fully understand them. If you

do not understand the risks that come along with the buying of cryptocurrency, we suggest you make your findings and fully understand these risks before buying as they can be numerous and for brevity this document will not be discussed extensively. Some of the risks however that befall digital currency will be discussed below;

– Technical difficulties may occur and may result in downtime during transaction processing which might at that moment be temporarily beyond us. During a period of downtime, users might experience issues with processing transactions.

– Security risks may also surface as users are required to secure their wallet information. If a user does not take precautionary measures before accessing his portal, private information could get stolen or leaked along with other relevant data and as such unauthorized access could be gained into the individual's account and funds may get carted away with. Security risks can range from exploitable server vulnerabilities, malware attacks and providing sensitive information to third party personnel. The OneNG team shall not be held responsible for losses or damages incurred as a result of falling victim to the various risks and uncertainties associated with the purchase of our cryptoassets.

The information provided here may be subject to translations from time to time and translation of this document, website and other services connected to this project may be made available in other languages besides the original (English). If a dispute arises as a result of inconsistencies in other versions or translations of this document, the English version shall be used as final reference.

All announcements regarding our project and its relevant documents including all whitepapers, brochures, slides, all descriptions and marketing materials will be made available on our websites and our official social media platforms. You are urged to discard external and unverified information from other sources unless the credibility of the information or the source is confirmed by us through an official medium of communication like our website or from our representatives.

By reading this disclaimer, you expressly agree that you comply with all that has been stated and will comply strictly to them to the fullest extent applicable by the law and will totally comply with the terms and conditions laid down.

Other risk factors associated with OneNG tokens, OneV:

certain risks and uncertainties may be associated with engaging on our platform and its associated services, some of which may be beyond what we can handle. These include but are not limited to;

Geographical laws

The OneNG team makes no claim that our platform and its connected services operate partially or in whole (or has legal permission to operate) in all demographic regions, or that the platform is appropriate for use in all locations. Accessing our platform and its connected services may be prohibited or illegal in regions where our services do not extend to. If you decide to still use our services outside of officially supported regions and locations or in a location with legal prohibitions in relation to our services, you agree to do so of your own initiative and are solely responsible for your actions.

Miscellaneous

If any part or provision of this agreement is

deemed invalid or unenforceable by a competent court of law, then other provisions left will nevertheless remain in full effect and will be reformed to effectuate the major intent of the parties to the best way possible. If such reformation is not made possible, then the term in question will be null and removed from the remaining terms, thus leaving other terms left to act in full effect independent of the one nullified. This agreement between you and us in relation to this subject matter remains absolute and will overcome any written or oral agreements with respect to it. This disclaimer may not be tampered with or modified except approved by the Company's executives and its active community.

An employee or staff of the company offering to modify or change any part of this agreement is acting in violation of our policy and this shall not be tolerated as strict legal consequences will be the result of such actions with immediate effect and against all those involved and in agreement to such forgery or falsification.

You may not rely and should not rely upon any statement from an employee of the Company or anyone trying to act on the Company's behalf from an unofficial perspective. This disclaimer has been drafted to involve you and the company only, excluding all third-party unless explicitly stated.

Terms of Termination

Effective from the date of accessing this document, the terms are effective and shall remain effective unless terminated. OneNG reserves the right to terminate this Agreement with immediate effect or at a scheduled time, for any reason, with or without cause, by providing prior notice to you.

OneNG also reserves the right to terminate this agreement immediately if you fail to comply with all terms stated in this disclaimer. Upon termination of this Agreement by either party, your right to access and use the platform and its connected services will cease immediately and all access and permission granted prior to the termination shall be denied.

We reserve the right at any time to time to change, halt, temporarily or permanently, any and all services offered by providing prior notice to you. We will not be liable to you or any third party for the modification or suspension of the platform and associated services.

Terms of Termination

Effective from the date of accessing this document, the terms are effective and shall remain effective unless terminated. OneNG reserves the right to terminate this Agreement with immediate effect or at a scheduled time, for any reason, with or without cause, by providing prior notice to you.

Disclaimer

OneNG also reserves the right to terminate this agreement immediately if you fail to comply with all terms stated in this disclaimer. Upon termination of this Agreement by either party, your right to access and use the platform and its connected services will cease immediately and all access and permission granted prior to the termination shall be denied.

We reserve the right at any time to change, halt, temporarily or permanently, any and all services offered by providing prior notice to you. We will not be liable to you or any third party for the modification or suspension of the platform and associated services.

Hacking and Security Concerns

Hackers, penetration testers and malicious groups or organizations may try to interfere with the functionality of the OneNG platform and its tokens in various ways, including, malware attacks, denial or distributed denial of service (DOS/DDOS) attacks, spoofing attacks and packet sniffing.

Risk related to disclosure of personal information.

OneNG and its community may in their discretion deem it necessary to obtain vital information about a certain user or purchaser of OneNG tokens in compliance with applicable laws or regulations of the individual's region. Such may not be the case for everyone on the platform, however, upon request and for investigative purposes, a user may be requested to provide further information and failure to do so gives us the right to refuse sales of OneNG tokens to the person until requested requirements are fulfilled. If provision of the requested information has been made and under applicable law the individual is allowed to purchase our tokens, such purchases will be validated instantly without hindrance.

Extra information provided that is out of the scope of basic information provided during registration will be destroyed for the sake of privacy.

Risks associated with an uninsured asset

Compared to regulated financial institutions, OneNG tokens are not insured unless the purchaser can insure them privately after making a purchase. If any form of loss happens or there is a large decline in the valuation of the token, there is no insurance policy in place to offer repayment to anyone holding it at that moment.

Risks associated with non-regulated cryptocurrency

Cryptocurrency and digital assets do not exactly have a form of regulation on them by any government authority in the manner that traditional equities are. This means whoever decides to use OneNG/OneV tokens as a means of investment will not enjoy protection of the law or regulations that govern other investment incentives as opposed to holding a digital asset.

Risk Related to corporate defamation

Corporate defamation, bad publicity or misrepresentation of the One NG community, team members, executives and the OneNG/OneV token can negatively affect the project as a whole and more importantly, negatively affect the valuation of OneNG coin. In a case where such negative representation of the project surfaces, we will try our best to debunk the claims and if need be, include a legal counsel to fight such a case in an applicable court of law. We also advise that if untrue, representing the project in bad light when not justified should be refrained from as the consequence would not be ours to bear alone, every one participating in our ecosystem may be affected too.

Unforeseen Associated Risks

All risks in relation to cryptographic tokens, cryptocurrency and its related services cannot be fully emphasized or discussed, besides from the risks

discussed that could arise from buying digital assets, there may be other risks not discussed here that may arise and may be beyond our control or may be completely unforeseen.

Results of such risks cannot be ascertained and its consequences are not absolute or calculated. All actions carried out by an individual or entity in relation to the OneNG/OneV token would be at their discretion and in cases where we can step in for support, we will. In cases where we cannot, we will specify with good reason and provide further directive.

Notice of Risk

OneNG extensively discusses the initial launch of the OneNG ecosystem. It does not act as a solicitation of investment and does not constitute an offering of securities in any jurisdiction. All plans presented in this document are subject to change as there are forward-looking statements based on opinions and critical analysis from our executives and members of our team.

All validated transactions and token sales made are final, you are advised to make adequate findings about other risks and costs associated with buying any tokens provisioned from OneNG.

If you live in a region where the holding and sale of cryptocurrency and cryptoassets is prohibited, you may not be eligible to buy or hold OneNG/OneV tokens or engage in services and programs that require the use of the tokens.
